Dear Mr. Hunter,

I am writing to express my interest in the intern position for Innovative Partnerships Group. I am currently a double major in Economics and Statistics & Data Science at UCLA, on track to graduate in 2026 with a 3.9 GPA. With an extensive foundation in data analysis, sports analytics, and baseball knowledge, I am eager to apply my academic skills and work experience to help your group succeed.

Throughout my academic journey, I have developed a deep proficiency in research, analytical thinking, and team leadership. I have gained experience in both quantitative and qualitative analysis through various internships, including my role as a Junior Analyst at Helios Ventures, where I researched and presented potential investment opportunities in the pre-IPO market. Additionally, my time as a real estate intern at Serene Team allowed me to refine my organizational and presentation skills while helping the business grow and run more efficiently.

At UCLA, I have honed my skills in data analysis, predictive modeling, and visualization, and developed a passion for transforming raw numbers into actionable insights. Whether analyzing multivariate datasets, designing efficient algorithms, or interpreting complex statistical outcomes, I love recognizing patterns in numbers. I am particularly drawn to opportunities that allow me to apply these skills to areas that spark my enthusiasm, such as baseball and the stock market.

I am eager to bring my blend of analytical, leadership, and problem-solving skills to Innovative Partnerships. I would welcome the chance to further discuss how my background aligns with your needs. Thank you for considering my application, and I look forward to hearing from you.

Sincerely,
Mason Lee
